

**CLAIMS**

5

1. A bedsheet retainer system for retaining bedsheets comprising:  
a latte around which bedsheets are wrapped;  
at least one clip to clip said latte.

10

2. A bedsheet retainer system for retaining bedsheets as in claim 1 wherein:  
said latte being separate and distinct from said clip.

15

3. A bedsheet retainer system for retaining bedsheets as in claim 1 wherein:  
said latte consisting of a plurality of interconnected latte segments connected in a  
male-female fashion by way of a latte tab.

20

4. A bedsheet retainer system for retaining bedsheets as in claim 1 wherein:  
said clip having a ratchet cooperating with a pawl and said pawl further comprising a  
depressable button to selectively disengage said pawl from said ratchet;  
handles moving around an axis;  
a biasing means set around said axis to bias said handles;  
jaws situated opposite said handles and cooperating with said handles to hold said  
latte and said bedsheets.

25

5. A bedsheet retainer system for retaining bedsheets as in claim 4 wherein:  
said button having a button axis and a button biasing means so that said pawl can

return to said ratchet;

said ratchet allowing said jaws to retain a degree of closure while being releasable so

5 as to free said bedsheets.

6. A bedsheet retainer system for retaining bedsheets having the following method of use:

wrapping said bedsheets around said latte and inserting said latte and said

10 bedsheets into said jaws;

closing said jaws onto said bedsheets by applying pressure on said handles;

depressing said button to free said latte and said bedsheets.
